

FEEDING CANADA

Exploring Our Food System

– A VIDEO SERIES –

BIOTECHNOLOGY

Pre-video

Q1: Have you heard the term biotechnology in relation to the food system? What does it mean to you?

Q2: Why do you think biotechnology is used in food systems?

Post-video

Q3: What are the two methods of genetic modification in food production? How do they differ?

Q4: What are some of the concerns with GM crops?
What does the evidence say?

Q5: How are genetically engineered food products regulated in Canada?

Q6: Now that you have learned more about biotechnology, have your views on genetically modified products changed? If so, how?
